

# The EZ JET™ Nozzle

replacement nozzle for Videojet® coding and marking equipment from...

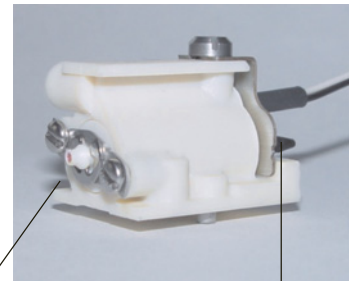

InkJet, Inc.® (IJI), the preferred global aftermarket supplier of industrial fluids, parts and service, proudly introduces one of the most innovative technological breakthroughs in nozzle design and performance in recent years.

IJI's new patented EZ JET nozzle is designed for replacement of Videojet EXCEL® series nozzles used in graphics and industrial market applications. The EZ JET nozzle provides a simple, cost-effective alternative to high-priced Videojet brand nozzles. Its unique field-replaceable components can help minimize downtime and maximize production output.

This nozzle has been tested extensively on Videojet EXCEL series coding and marking equipment in both laboratory and live-production environments. IJI backs the EZ JET nozzle and its field-replaceable components with a full one-year warranty.

- **Stop replacing nozzles!** Minimize nozzle maintenance costs by cleaning or replacing the nozzle orifice and filter assemblies as required.
- **Stop stocking nozzles!** Reduce inventory carrying costs by stocking low-cost EZ JET nozzle orifice and filter assemblies from IJI rather than expensive OEM nozzles.
- **Stop ordering nozzles!** Eliminate the hassle of ordering OEM nozzles of various sizes. The EZ JET nozzle works in all Videojet EXCEL series printers.
- **Stop wasting money!** Save on printer cost of operation by using the EZ JET nozzle and value-priced fluids from IJI.

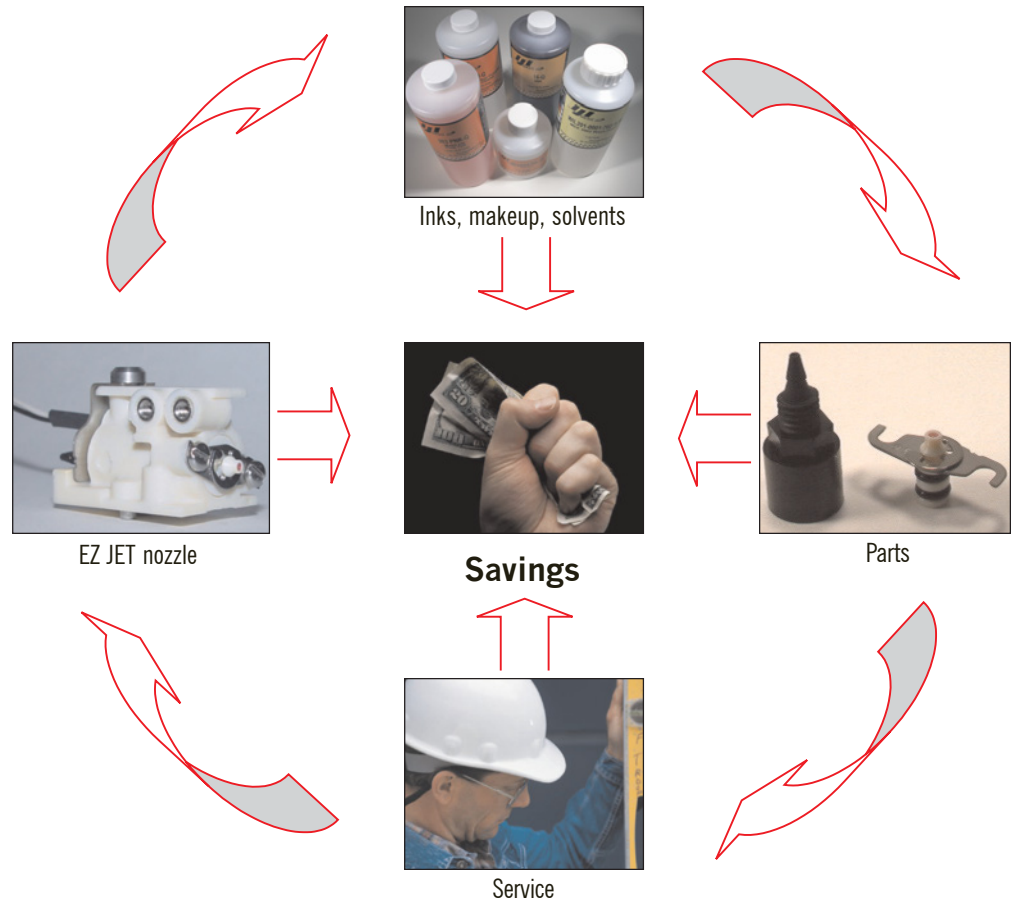

The nozzle orifice assembly (above) and filter assembly (right) are the field-replaceable components of the EZ JET nozzle from InkJet, Inc.

*Quality + Price + Service = Value*

**Maximize the value** of the EZ JET nozzle, realize a quicker return on investment, and lower operational costs when you rely on IJI as the **one-stop source** for all your inkjet needs:

- complete line of aftermarket inkjet fluids and replacement parts for a wide variety of OEM coding and marking equipment
- experienced service technicians available for maintenance and repair of most major OEM coding and marking equipment

### Technical Specifications

The EZ JET nozzle will operate at all Videojet EXCEL series machine frequencies.

The EZ JET nozzle will accept all orifice sizes that are used in Videojet EXCEL series printers, including

- 36 micron
- 53 micron
- 66 micron
- 70 micron
- 80 micron
- 120 micron
