PUTTING YOU BACK IN CONTROL

Gone are the days of OEMs mandating which consumables you use. Designed specifically for the Videojet® 1000 Line of continuous inkjet printers, InkJet, Inc.’s Open Source Fluids put you back in control of your production line. These fluids are higher quality and more budget friendly than the OEM alternative. The Open Source line of fluids, including inks, makeups and cleaner, are available as direct replacement of commonly used Videojet® fluids or via custom ink development.

A NEW CLASS OF FLUIDS

InkJet, Inc. is known for producing the highest quality fluids available by utilizing an enhanced filtration system during ink production. Our unique filtration system eliminates any insoluble particles resulting in the cleanest ink possible and reducing downtime due to clogging and other ink or nozzle issues. This perfected process is used in the production of all Open Source fluids.

COMPATIBLE ALTERNATIVE

InkJet, Inc. offers a series of guaranteed compatible, direct replacement fluids for the Videojet® 1000 Line of CIJ printers. When you are ready to replace your current cartridge, you can do so with our Open Source Fluid Cartridge with no flushing or maintenance needed - simply remove the old cartridge, install the new cartridge and continue printing!

INK INNOVATION EXPERTS

In addition to direct replacement inks, InkJet, Inc. can provide ink development and manufacturing services for unique or complex applications. Our custom inks have been developed by our field-experienced chemists in our on-site laboratory and state-of-the-art manufacturing facility.
